## **Netronome CEO to Present at America's Growth Capital 7th Annual East Coast Emerging Growth Conference**

*Rapidly growing developer of highly programmable semiconductors to provide an in-depth look at Netronome*

**Boston, MA – October 25, 2010** – [Netronome](#), the leading developer of network flow processors, today announced that the company's CEO, [Niel Viljoen](#) will present at the [America's Growth Capital \(AGC\) 7th Annual East Coast Emerging Growth Conference](#) taking place October 27, 2010 at the Westin Copley Place in Boston. This year's event will feature executive presentations from a number of emerging growth companies.

Mr. Viljoen's presentation will take place Wednesday, October 27 at 12 p.m. in the St. George B Room and will provide an in-depth look into Netronome. [Netronome Network Flow Processors](#) are the industry's only processor specifically designed for tight coupling with embedded multicore Intel® and x86 processors. The NFP-3240 brings breakthrough performance to a broad range of demanding network, security and content processing products used in 40 Gbps and 100 Gbps networks. It is the only line of processors backward compatible with the market-leading Intel IXP28XX. Netronome's processors are supported by comprehensive tools, and a broad ecosystem of premier partners and suppliers.

"I am honored to be invited to present with so many exciting companies," said Mr. Viljoen. "Netronome's invitation to this event is a testament to our company's growth and continued success. We look forward to continuing to develop innovative network flow processors which provide 10, 40 and 100 Gbps performance to effectively address the growing throughput and intelligence demands placed on today's networks."

### **About Netronome**

[Netronome](#) is a leading developer of highly programmable semiconductor products that are used for intelligent flow processing in network and communications devices. Netronome's solutions include network flow processors and acceleration cards that scale from 10 to 100 Gbps. They are used in carrier-grade and enterprise-class communications products that require deep packet inspection, flow analysis, content processing, virtualization and security. Netronome's products are developed in labs in Santa Clara, CA, Boxborough, MA and Pittsburgh, PA.
