

Netronome Partner Program

| Enabling Partner Value for Server Based Networking |

Netronome's **Partner Program** is designed to bring the performance, flexibility and scalability of Netronome's portfolio to our partners. Running on industry standard x86 COTS servers, Agilio SmartNICs and software are the ideal server-based networking platform for OpenStack, SDN, Contrail, virtual switching, NFV, security and analytics applications, among others. By combining our technology with your expertise, you can increase your footprint and magnify your value proposition in data center, enterprise and service provider markets.

Benefits of being a Netronome partner include:

- A worldwide reseller program that reaches high value customers and rapidly growing markets with industry leading networking solutions.
- Access to a strong portfolio of high-performance Agilio SmartNICs and software to magnify the value of your solution
- The speed of software innovation at the performance of silicon. Netronome's flexible SmartNICs assure rapid development cycles to keep pace with industry evolution.
- Expert technical training that educates you on the Netronome value proposition
- Regular roadmap reviews to ensure long term success
- The industry's highest performance platform for cloud and data center solutions
